CODEPOINT Softwares is a private limited company based in India, which provides enterprise-wide solutions since 2007. We are technology consultants focused on core area of competence in SOFTWARE DEVELOPMENT, WEB-DESIGNING & DEVELOPMENT, WEB HOSTING & APPLICATIONS, and GAME DEVELOPMENT. We assists in the identification and development of business opportunities in emerging IT service markets.

"Innovation through solutions, Quality through services and, Global growth with superior customer satisfaction is our vision."

Our strength is the support of professionals who have the operational experience in different activities from leading organizations. In a short period of time, the team has won the trust of customers. The company is strongly focused on and committed to delivering customer specific solutions in the domain verticals such as E-commerce Applications, Web Designing & Developments, Educational Game Portal, E- Learning Portals, ERP Solutions, School/College Management Software, etc.

Virtual Academic Master (VAM) –Online Academic Management System is a feature-rich, offline as well as online operational single platform system. We have designed the system as a Next-Generation Academic Management Solution, with advanced technology, to provide online interactive community of stakeholders to enhance the efficiency of academic institution administration and improve resource optimization, thus to raise the standards of academic institution worldwide.

This academic community portal provides state-of-the-art online interactive communication and backend administration functions.

Yet another advantage of this academic management system software is that it runs on minimal hardware and easily fits in the budget of institutions.

The software being web based can be accessed from anywhere, any time, in which the system enables the students, parents, teachers & the management to be in touch with each other.

The software presents both school management process and learning process.
We call it as "Cyber schooling".

Benifits & Advantages of VAM

➤ **VAM is a system**

- to improve students & teachers performance
- to focus on student's behavior & skills
- to quickly access information
- to achieve academic excellence
- to integrate academic & management system into one platform
- to monitor & control the entire campus through online at any time.

➤ **VAM for Student Community**

- Reserve library books online
- Access progress reports & other academic reports.
- Access projects/assignment/home works online.
- Access audio visual interactive learning programme (Master Mind e- tutor)
- Makes themselves reliant and independent in learning by using software for self assessment & self evaluation.
- Get the event information & newsletters online.

➤ **VAM for Parent Community**

- View the time table of their wards – with teacher name & subject.
- View the exam schedules of their wards- term & class test, along with the portions & date.
- Access their ward's daily attendance online
- View academic performance of their ward online, such as;
  Progress/Class Test & Performance report, Assignments/Home work/Projects details
  Library books usage details, Confidential reports from teachers
- View event information/Fee details- (paid & dues)/
  Newsletters /PTA meetings/School bus details/Co-curricular activity details
- Online fee payment facilities
- Access quick information through SMS.
- Communicate with teachers/principal easily through internal mailing system anywhere in the world.

➤ **VAM for Teacher Community:**

- Post daily attendance easily
- Prepare the progress reports & other reports faster
- Prepare lessons/assignments easily
- Communicate parents/principal/teachers online

VAM- facilitates the management to know everything happening in the academic institution, ☐
so that they can have proper control without being present in the campus.

VAM helps automate all the process within an academic institution and makes the academic ☐
management easier by reducing the manual works.

VAM benefits all types of communities within an academic institution. ☐

Master Mind e-tutor is an interesting and easy method of learning for school children via CD and Online Portal for classes KG to XII.

The subjects we provide for classes KG to IV are English, EVS and Mathematics, for classes V to VII are Mathematics and Science, and for Classes VIII to XII are Mathematics, Physics, Chemistry and Biology.

It is divided into two study sections. Section one is **Learning Area** and Section two is **Experimental & Practical Study Area.**

The Experimental & Practical Study Area will be provided with timely online updates, practical tests and tips, which will boost up the confidence of the students.
It presents lessons in a creative way with colorful, exciting and interesting animated graphics so that learning never gets boring for the students.
